

**pooled GEO, gene function**

vertices: n = 35, edges: n = 170

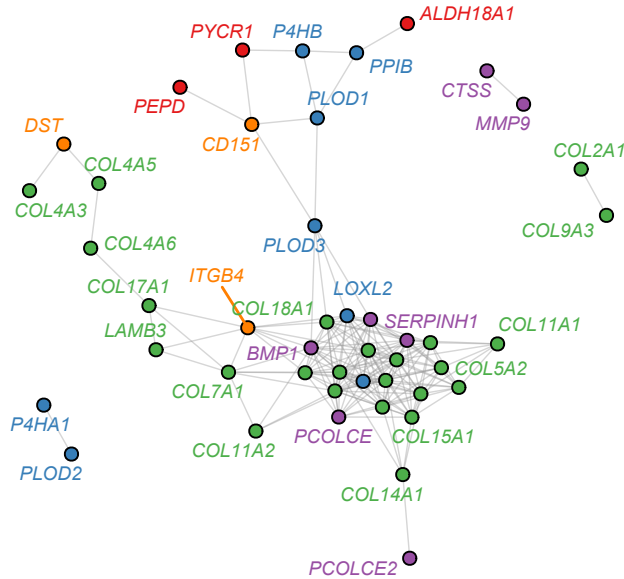

**TCGA, gene function**

vertices: n = 43, edges: n = 254

**DKFZ, gene function**

vertices: n = 45, edges: n = 190

**gene function**

- proline metabolism
- collagen modification
- ECM component
- ECM processing
- adhesion
